

A Basic List

```
<ListView x:Name="listView" />
```

```
listView.ItemsSource = new List<string> { ... };
```

Cell Types

- TextCell
- ImageCell

```
<ListView>
  <ListView.ItemTemplate>
    <DataTemplate>
      <TextCell Text="{Binding Name}"
                Detail="{Binding Status}" />
    </DataTemplate>
  </ListView.ItemTemplate>
</ListView>
```

Custom Cells

```
<DataTemplate>
    <ViewCell>
        <StackLayout>...</StackLayout>
    </ViewCell>
</DataTemplate>
```

Grouping Items

```
<ListView
    IsGroupingEnabled="true"
    GroupDisplayBinding="{Binding Title}"
    GroupShortNameBinding="{Binding ShortTitle}">
```

```
listView.ItemsSource = new List<ContactGroup>
{
    new ContactGroup("A", "A")
    {
        new Contact { ... }
    }
}
```

Handling Selections

```
<ListView ItemTapped="..." ItemSelected="...">
```

Context Actions

```
<TextCell>  
    <TextCell.ContextActions>  
        <MenuItem Text="Call" Clicked="..."  
            CommandParameter="{Binding .}" />  
        <MenuItem Text="Delete" Clicked="..."  
            IsDestructive="true" />  
    </TextCell.ContextActions>  
</TextCell>
```

Pull to Refresh

```
<ListView IsPullToRefreshEnabled="true" Refreshing="...">
```

```
listView.EndRefresh();
```
